

Water pollution

say something

In parts of the world, people are throwing garbage into the ocean, and this is having negative impacts on ocean life, and even on our own health

OCEAN LIFE CAN BE HURT OR KILLED BY OCEAN POLLUTION

Millions of animals live in ocean, but because of ocean pollution some animals are getting ill, moving to other places, and even dying. Garbage like fishing nets is getting stuck around animals necks, and killing them.

WATER POLLUTION IS BAD FOR THE ENVIRONMENT

Water pollution influences the environment too. Before, our home, the Earth, was beautiful, but now it's really dirty and uncomfortable.

WATER POLLUTION LET PEOPLE ILL

Because of water pollution people do not have enough clean water to drink. Some people only have access to polluted water, and use polluted water for washing, cooking and other things. Many people get sick, or even die.

Now every year has about 4200 hundred million cubic meters sewage drains off into the ocean, lake or other bodies of water around the earth.

W.H.O prove ,have 80% disease about water pollution. And around the earth every year have 25000000 children die because of dirty water. In China also have 24% people still use polluted water.

How terrible !!!
